PUTTING THE DIGITAL INTO YOUR HUMANITIES @ GHENTCDH!

DH Support

The Ghent CDH offers advice and guidance throughout the research project lifecycle where digital tools, methods or collections are used. For the research data management and training we work closely with the Library Lab of the Faculty of Arts and Philosophy Library.

| DH Support | Geospatial analysis | Digital text analysis | Collaborative databases |

Ghent Centre for Digital Humanities engages in the field of 'Digital Humanities' at Ghent University, ranging from archaeology and geography to linguistics and cultural studies.

It develops DH collaboration and supports research projects, teaching activities and infrastructure projects for Ghent University.

Four Service Clusters

— **DH Support**: advice, guidance, training throughout research project lifecycle

— **Digital text analysis**: digital corpus management and analysis

— **Geospatial analysis**: geo-spatial data management, visualisation

— **Collaborative databases**: setting up a database, linked data, social network analysis

And a **Digital Humanities Research Lab**!
