

# MADOC: EASILY ENRICHING DIGITAL COLLECTIONS

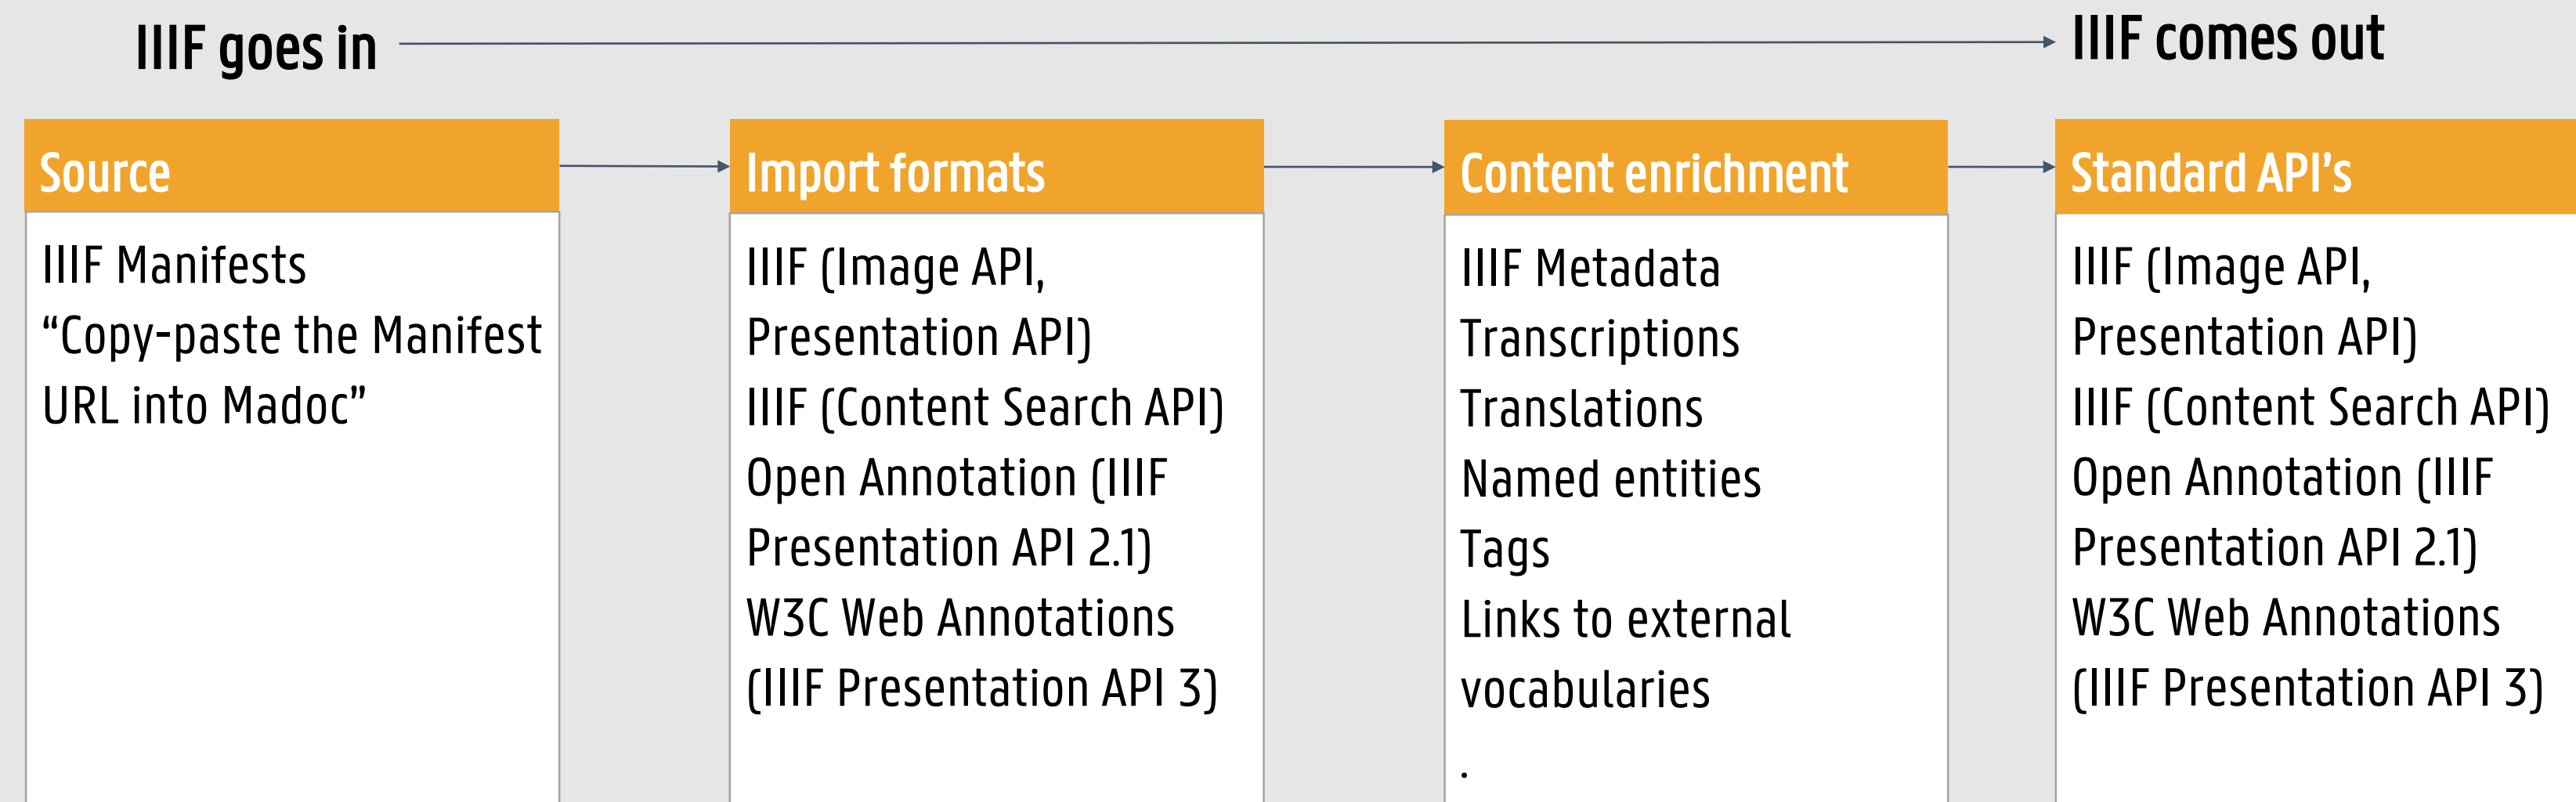

## What is Madoc?

Madoc is an annotation- and crowdsourcing platform to enrich digital collections. Madoc allows you to create custom projects around images and collections. Madoc is generic, flexible and user-friendly, allowing you to easily customize your project and create a personalized web-environment around the needs for your project. Madoc is user friendly for its various users!

### IIIF-enabled

Madoc is driven by IIIF technology. IIIF, short for International Image Interoperability Framework, is a new standard for sharing and presenting images. It is an open-source technology whose development is supported by a widespread international community. Through IIIF, you can easily share your images and collections: publish it once, re-use often!

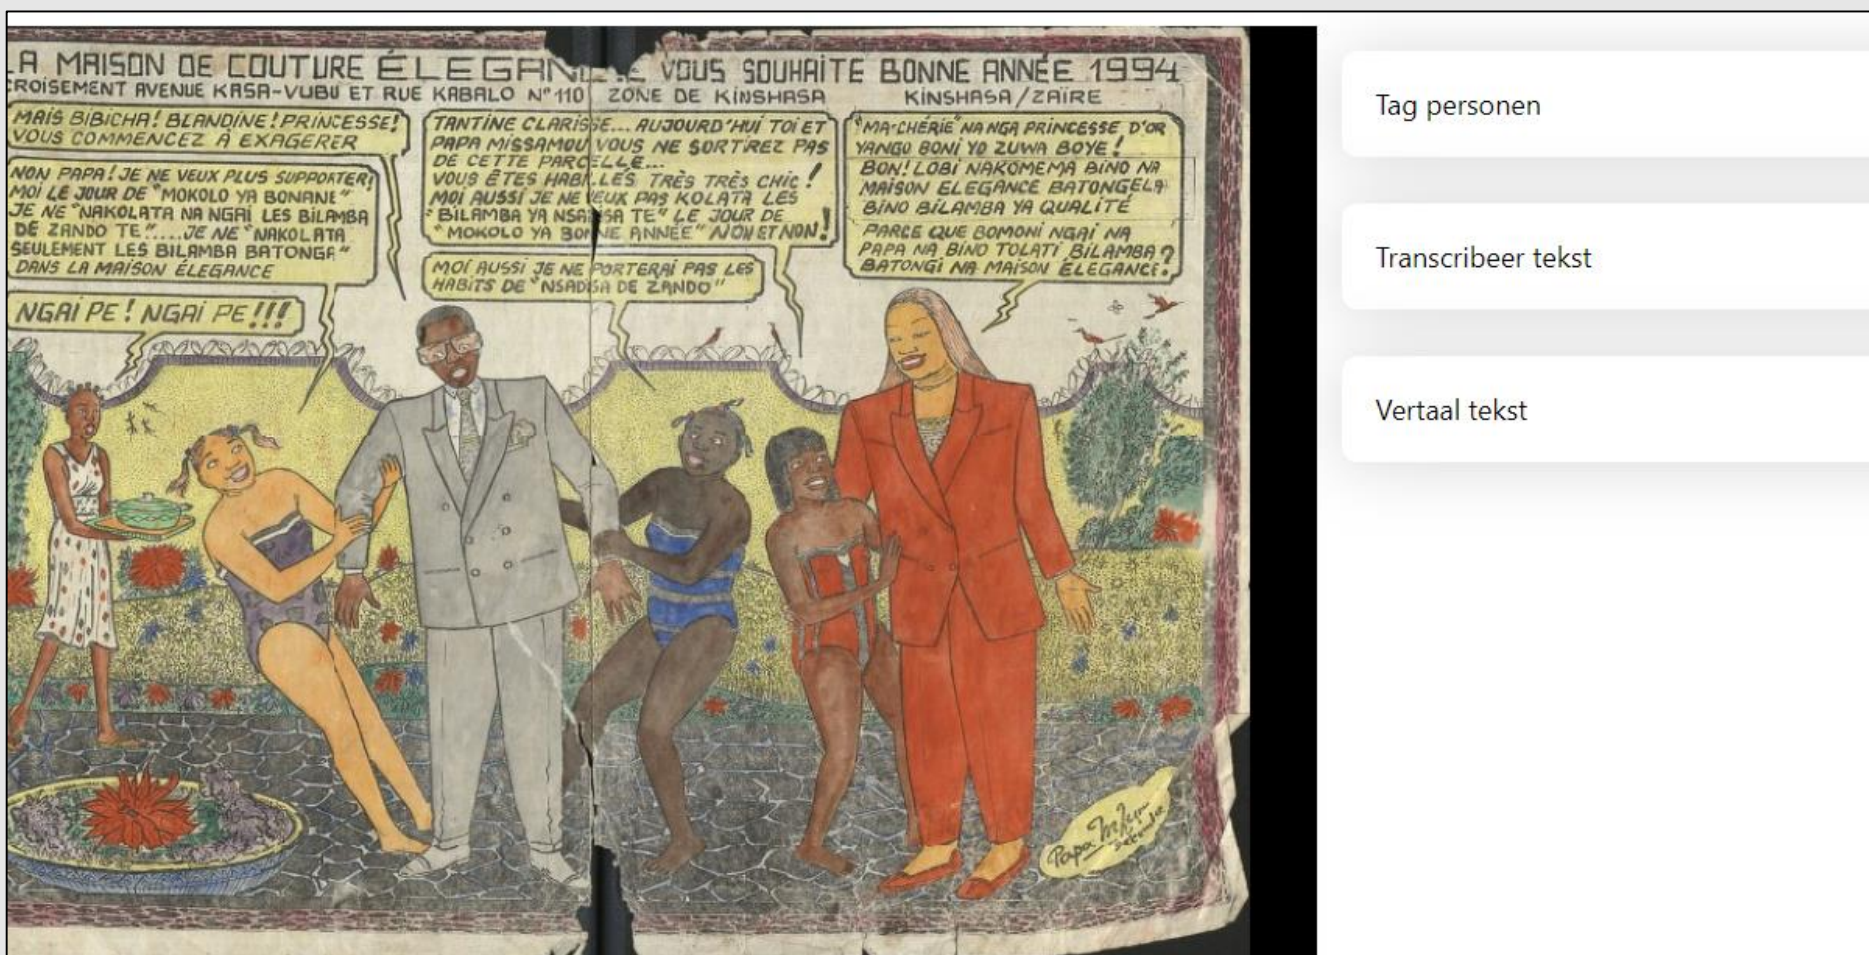

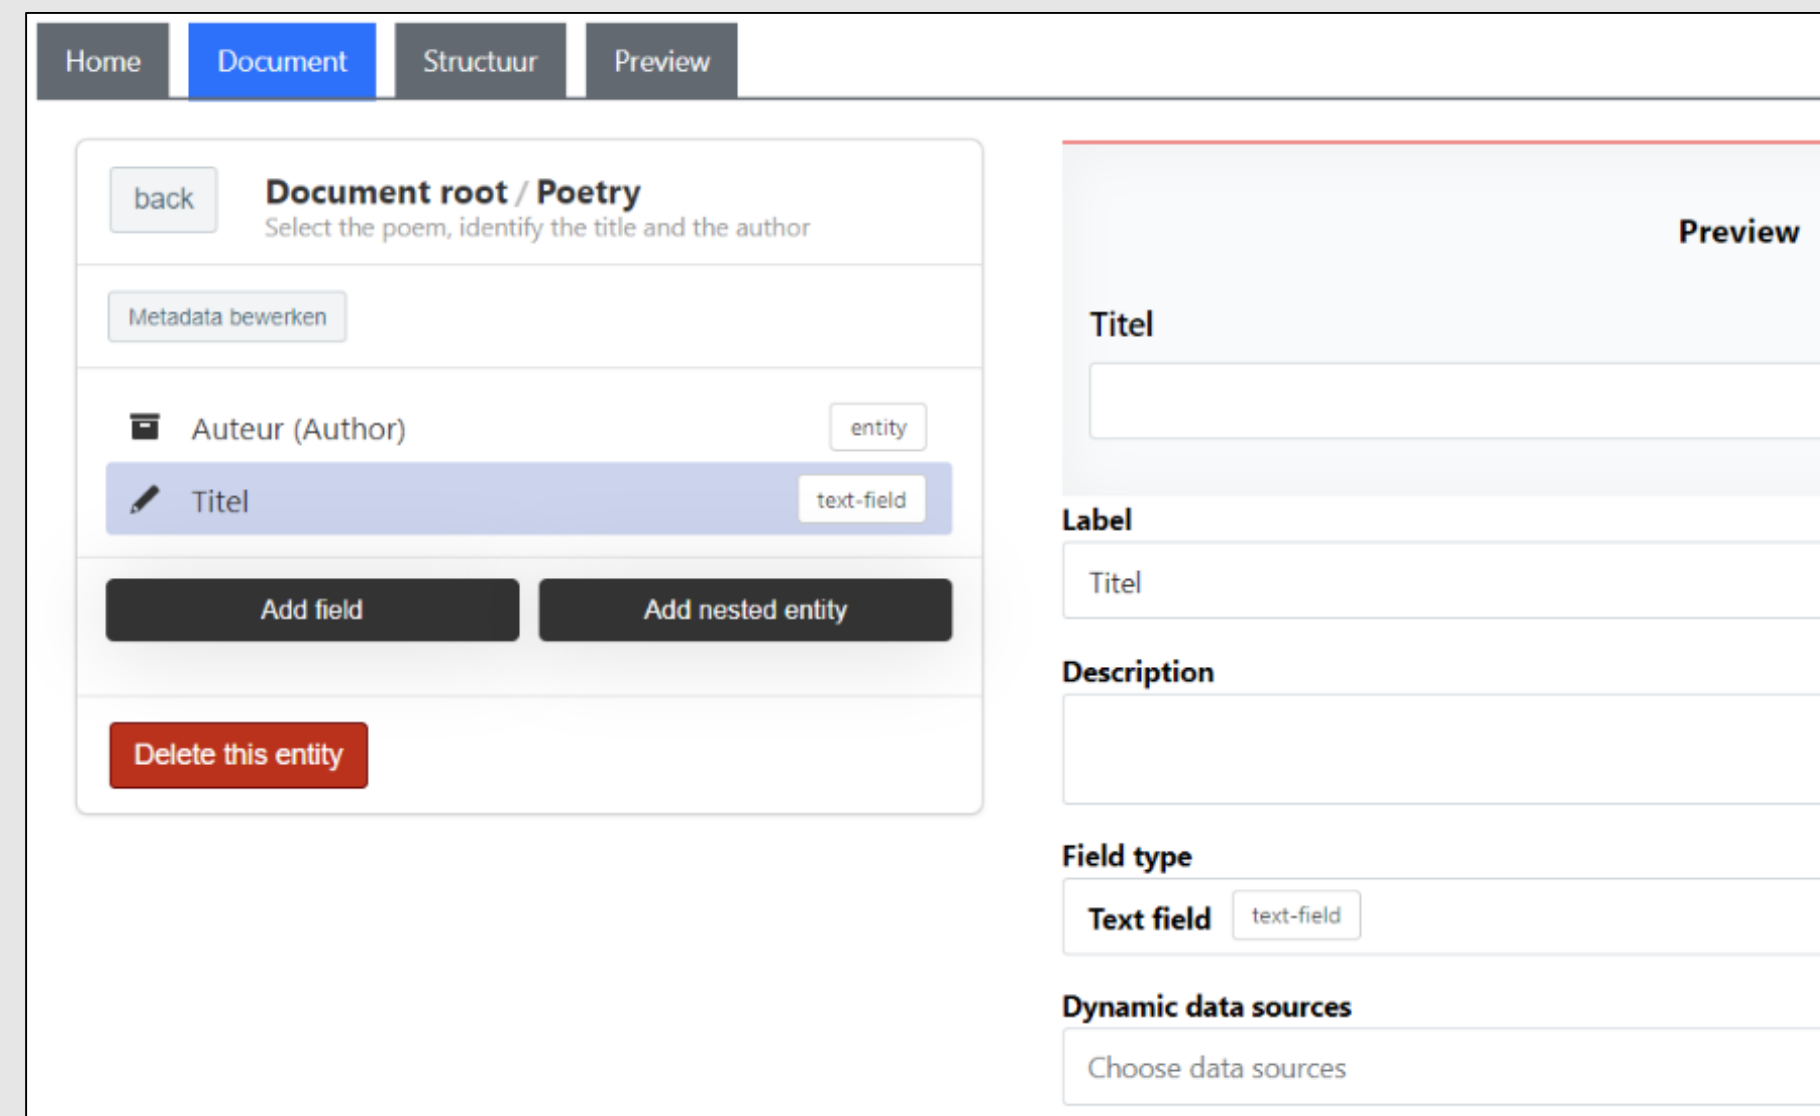

## Madoc Enrichment Pipeline

## Lifecycle of a Madoc project

### Step 1: Configure

- ✓ Import images
- ✓ Create collections
- ✓ Start projects
- ✓ Personalize your data model
- ✓ Design the web-environment
- ✓ Manage users

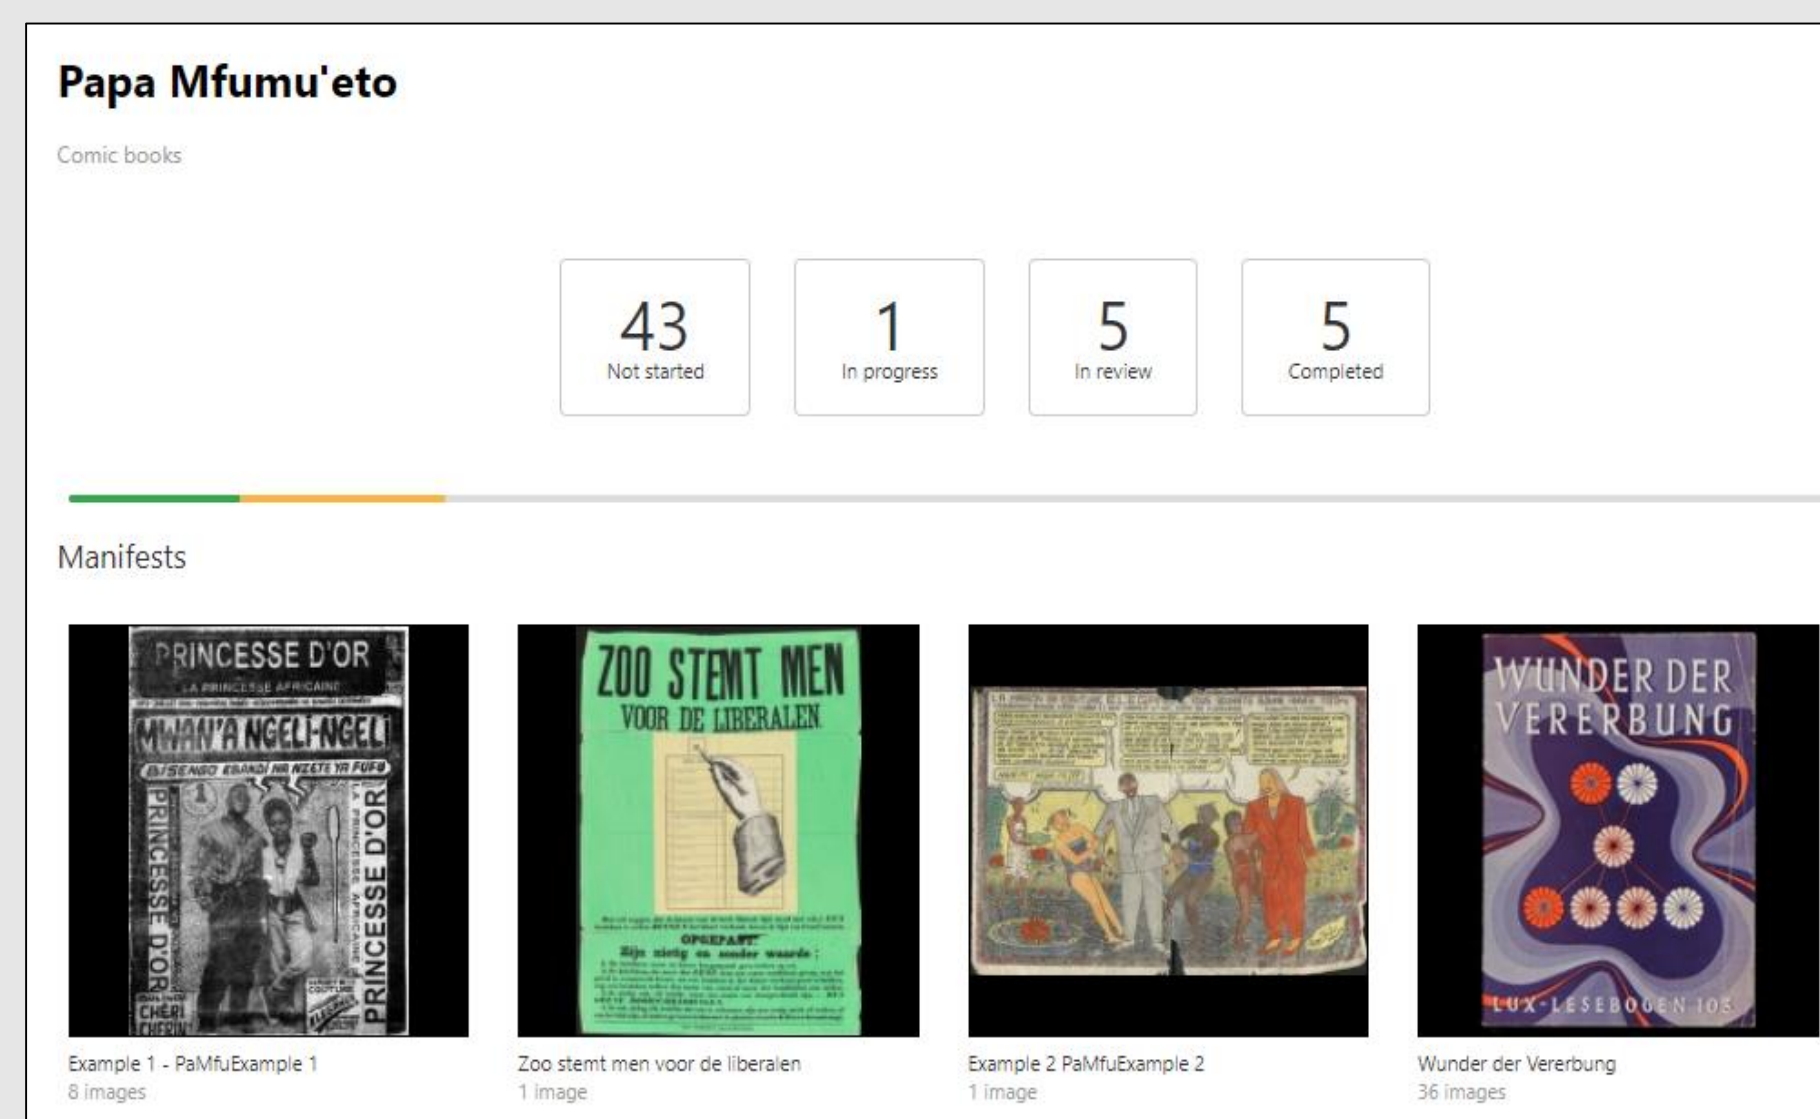

### Step 2: Enrich

- ✓ Annotate
- ✓ Transcribe
- ✓ Translate
- ✓ Add metadata
- ✓ Crowdfund
- ✓ Correct OCR and HTR
- ✓ Collaborate

### Step 3: Share

- ✓ Showcase collections
- ✓ Create a basic virtual exhibition
- ✓ Navigate through annotations
- ✓ Filter by metadata
- ✓ Export IIIF
- ✓ Research

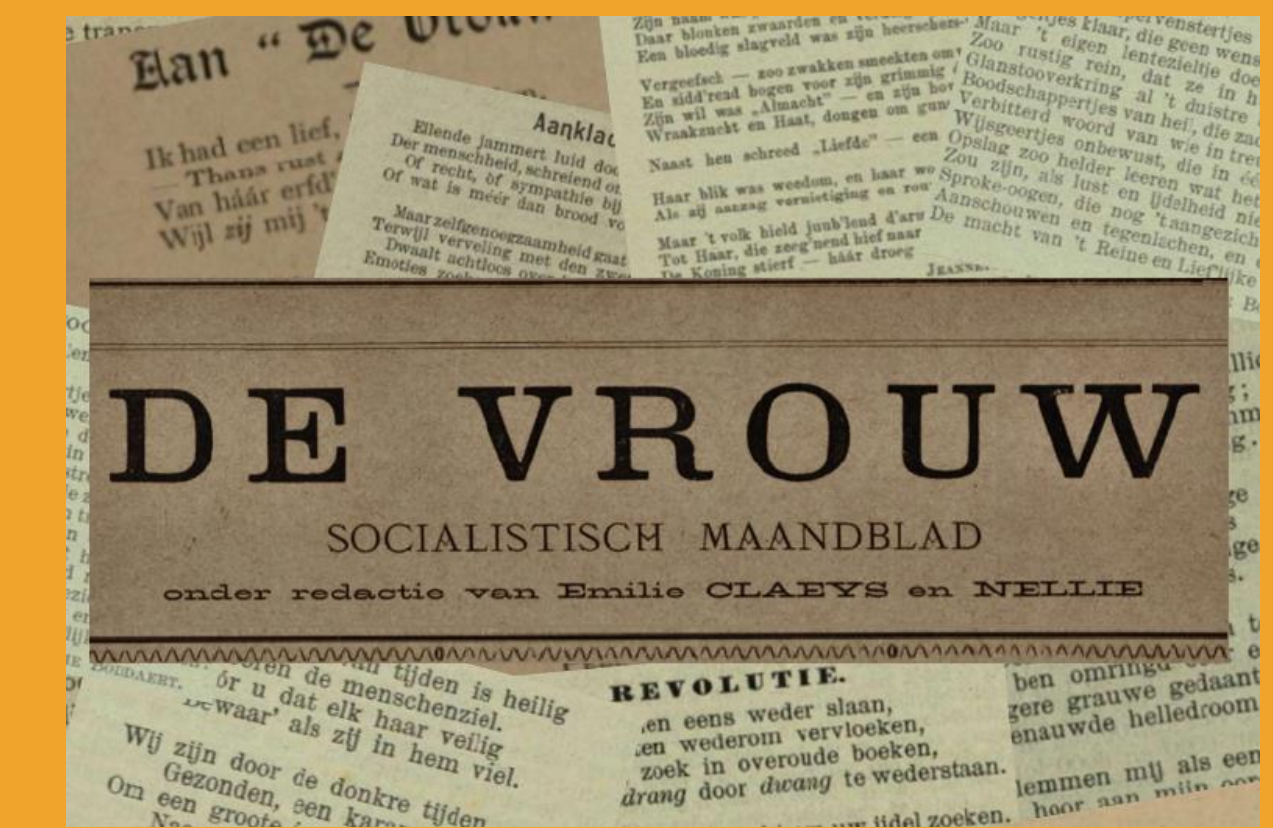

## Example projects

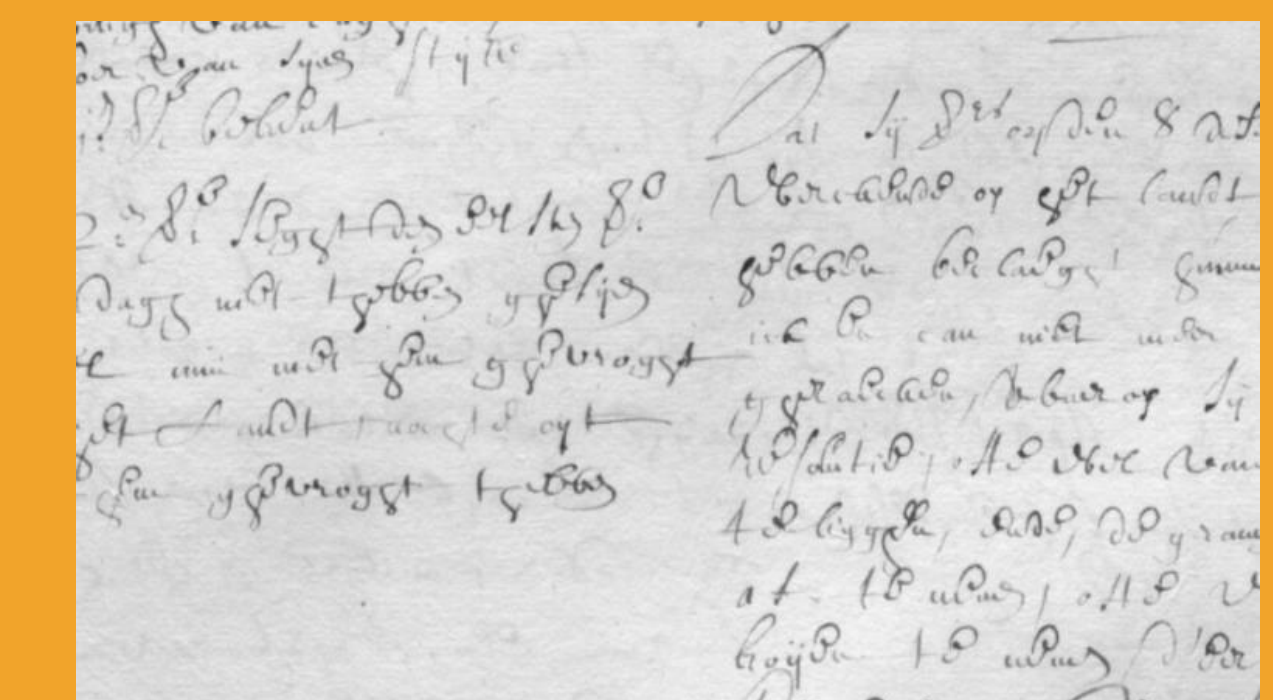

### Papa Mfumu'eto

Translating (Lingala -> English) and annotating comic books of Papa Mfumu'eto

### Poetry in 19th-century periodicals

Finding, annotating, enriching and analyzing poetry within 19th-century feminist periodicals

### Getuigenissen

Transcribing 18th- and 19th-century witness testimonies
